12. SWOC Analysis

Strength:-

- I. High percentage result
- II. Qualified, motivated and competent faculty with a blend of high experience and young and energetic dynamism
- III. Participation in seminars and conferences
- IV. Priority to teaching learning process
- V. Personal library
- VI. Supporting slow learner and weaker student through remedial and tutorial classes

Principal
Nilamani Mahavidyalaya
Rupsa, Balasore

Weakness:

- I. Lack of interest among students to study in English medium
- II. With a rural background less exposure of the student to competitive world
- III. As many students belong to poor socio-economic background, they may not be able to get the required academic inspiration from home
- IV. Due to lack of proper transport facilities long distant students face problem to attend the classes regularly

Opportunity:-

- I. The department always tries to inspire its student for future career
- II. To train and counsel the students to become either employable or entrepreneur
- III. In spite of having certain limitations, the department tries to render quality education
- IV. Continuous effort are being made to enhance quality of the student
- V. Add on courses like spoken English, fundamental computer training and career counselling can bring new opportunities for the students of this department

Challenges:-

- I. To create interest among students to be regular to classes
- II. To inspire the students for higher studies
- III. To make aware to the students of history that various career opinions are open to them especially tourism, archaeology, museum etc.

Future plan of the Department:

- I. Educational tours to historical places shall be initiated to create historical interest among the students
- II. To conduct more syllabus oriented seminars for the students
- III. To conduct life skill development programme regularly
- IV. To train the students for job opportunities and higher studies

1. Name of the Department: Political Science

2. Vision and Mission of the Department:

Vision

The Department of Political Science endeavours to generate new knowledge & produce students who are trained in Political Science and encourage the students to prepare for all types of competitive examinations, particularly for Civil Service.

Mission

The Department of Political Science seeks to provide students with a learning experience that will equip them to face the challenges of an increasingly complex job market and prepare them to become active and engaged citizens at the local, national and international levels. The political science program includes a strong background in the fundamental branches of our discipline: Indian politics, comparative politics, international politics, political theory and public administration. Students gain abilities to critically assess contemporary political events and identify practical solutions to social problems. The program of political science provides the knowledge required to pursue successful careers in government, academics, and the private sector.

CONTENTS

1. ABOUT THE COLLEGE
2. OBJECTIVES & METHODOLOGY
3. THE ENERGY AUDIT TEAM
4. ENERGY AUDIT REPORT
5. SUGGESTIONS AND RECOMMENDATIONS

ABOUT THE COLLEGE

Nilamani Mahavidyalaya, Rupsa, is situated on the side of NH-60, At-Rupsa, Sadar Block of Balasore. The college bears a solitary look most befitting for a centre of Higher Education. Though late, with the popular will and craze for Higher Education, the college was established in the year 1976. On one side of the town stands the temple of learning in sylvan surrounding, sprawling around more than 05 acres of land.

OBJECTIVES AND METHODOLOGY

With increasing population and demand for energy resources, negative impact on environment has been increasing too. The level of population has increased and the resources that the natural world has to offer to humans has decreased because of its overuse and misuse, and in a decade or two, the world will be facing severe energy crisis. It is not possible to abandon the existing energy sources as they have become fundamental ingredient in human life but, it is absolutely possible to use it in a controlled manner in away that its impact on the environment can be reduced and energy can be conserved, and adopt more

renewable sources of energy for everyday use. Majority of the primary energy is used as electricity and in transportation sector. It is very essential to cut down on the usage of on the environment and save it for the future generation.

Nilamani Mahavidyalaya, rupsa, is an educational institution that believes in maintaining a green campus status and has taken every possible measures to benefit the environment and safe guard it. It has formed an Energy Audit team of four members who examine the energy consumed by the college and suggests methods to reduce the amount of energy used by the institution.

The energy audit team surveys the college campus, including Hostels, its building structure, equipment used by the institute, its maximum capacity of usage, energy consumed and how much the college saves. They study the pattern in which the college consume energy. The team walk around the campus and examine the authenticity of the data they received through survey. They examine if the college has implemented any energy efficient equipmented any energy efficient equipment and it has opted for any alternative source of energy as a method of energy conservation. The audit team, then, give their necessary suggestions and recommendations to the college on how can reduce energy consumption and conserve more.

The energy audit team aims at reducing energy wastage within the college campus because natural resources are limited and it is required to be saved for the future generation. The audit team guides the institution on ways to save more energy by reducing energy consumption.

The college has conducted awareness programs on the deteriorating State of the natural resources and environment and encourages its Staff and students to use either walk to the campus or use bicycles or battery operated vehicles.

ENERGY AUDIT REPORT – 2021- 2022

Nilamani Mahavidyalaya, Rupsa, Balasore has provision for the usage of 470 electrical and electronics appliances as required. Total power supply due to these electrical appliances of the college is around 27.26kW. The college has following appliances where electrical energy is used:

- LED-56(9W)
- LED TUBE-61(20W)
- FAN-181(70W)
- TUBE LIGHT-20(40W)
- BULB-100(1W)
- WATER PUMP-01(1/2 HP)
- A.C-4(150W)
- WATER PURIFIER-6(40W)
- STAND FAN-1(125W)
- FRIDGE-3(125W)
- PRINTER-12(100W)
- PRINTER-1(300W)
- COMPUTER-23(120W)

Therefore, the total number of appliances that may be used by the institute is 470. The college uses around 200 appliances on working days and around 50 appliances on non working days. Appliances, like sound box, LCD TV, Air Conditioners, are used occasionally.

DATA ANALYSIS:

We study the details of the 12 months electricity bills.

Sl no	Month	No. of units in Kwh
1	Jan, Feb-22	324
2	March-22	367
3	April-22	270
4	May-22	475
5	June-22	238
6	July-22	346
7	Aug, Sept-22	1644
8	October-22	1542
9	November-22	1253
10	December-22	1502
11	January-23	419

Average energy usage is around 645kWh/month (average of 13 months). The college has recently established solar panels so as to lessen the consumption of energy (power

consumption is 120 units in Jan and Feb 23).The connection of solar panels and the use of more number of LEDs has lessen the energy consumption during the last month.

Existing features for energy savings:-

1. Staff Vigilance
2. Incandescent bulbs are nowhere used.
3. Maximun use of natural light.
4. Cross ventilation is provided in laboratory and class rooms which reduce the use of number of fans.
5. Walls are painted with off white colour to have sufficient brightness.
6. Computers and printers are shared in LAN.

SUGGESTION AND RECOMMENDATIONS

- Reduce the usage of conventional light sources.
- Make provision for more alternative sources of energy.
- Purchase appliances with five stars.
- Replace old appliances.
- Use computers in power saving mode.
- Lessen the use of vehicles, running on traditional petroleum fuels, by staff and students coming from nearby places to college.
- To make usage of more solar panels functional soon.
